PROFESSIONAL SUMMARY

Detail-oriented Data Analyst with hands-on experience validating 20,000+ records, building KPI dashboards, and executing SQL-based reporting workflows. Skilled in SQL, Power BI, Tableau, and Excel with a strong foundation in ETL concepts, data cleaning, root cause analysis, and operational reporting. Experienced in supporting adhoc business requests with accuracy and speed. Seeking a full-time role as a Data Analyst, BI Developer, Business Analyst, MIS Analyst, or Data Operations Analyst where I can convert raw data into decisions that move the business forward.

TECHNICAL SKILLS

- Languages & Query** : SQL (Joins, Aggregations, Subqueries), Python (Basic), MySQL
- BI & Visualization** : Power BI (DAX, Power Query, Dashboards), Tableau, Excel (PivotTables, VLOOKUP, Charts)
- Data Skills** : ETL Fundamentals, Data Validation, Data Cleaning, Data Modeling, Operational Reporting
- Databases & Warehousing** : MySQL, SQL Server (Basic), Data Warehousing Concepts, Dimensional Modeling (Basic)
- Reporting & Analytics** : KPI Dashboard Development, Root Cause Analysis, Trend Analysis, MIS Reporting, Adhoc Analysis
- Soft Skills** : Attention to Detail, Cross-functional Collaboration, Analytical Thinking, Process Improvement

WORK EXPERIENCE

AIVARIANT, Bengaluru, India
Data Analyst Intern

May 2025 – Nov 2025

- Validated and audited 20,000+ records across operational datasets, reducing data inconsistency rate by ~15% and improving downstream reporting accuracy.
- Executed SQL joins, aggregations, and data extractions across 50+ datasets, cutting manual reporting prep time by ~30% and enabling faster business decisions.
- Developed and maintained Power BI and Excel dashboards tracking 10+ KPIs, giving operations teams real-time visibility into performance trends.
- Performed root cause analysis on recurring reporting gaps, identifying 3+ systemic issues and implementing fixes that reduced repeat errors by ~20%.
- Processed adhoc operational requests with consistent <24-hour turnaround across 5+ concurrent business workflows, maintaining 100% data accuracy compliance.
- Led workflow optimization initiative that standardized 8+ reporting templates, improving team data-prep efficiency by an estimated 25%.
- Collaborated cross-functionally with operations and business teams while maintaining strict data confidentiality protocols.

PROJECTS

Supply Chain & Inventory Analysis

Tools: SQL, Excel, Tableau, Power BI

- Analyzed supply chain and inventory datasets to evaluate sales performance, stock availability, and operational efficiency.
- Utilized SQL and Excel for data cleaning, transformation, and KPI calculation.
- Developed interactive Power BI and Tableau dashboards to monitor inventory turnover, demand fulfillment, and supply chain performance.
- Identified inventory risks, operational bottlenecks, and demand trends through data-driven analysis.
- Delivered actionable insights supporting inventory optimization and supply chain decision-making.

Pizza Sales Analytics Dashboard | Excel + Tableau

Tools: SQL, Excel, Power BI

- Analyzed sales transactions and product performance data to evaluate revenue trends and customer demand patterns.
- Built KPI-driven Power BI dashboards tracking revenue, orders, product categories, and sales performance.
- Performed category-wise and product-level analysis to identify top-performing and underperforming menu items.
- Identified key revenue drivers and demand patterns to support menu optimization and pricing decisions.
- Generated insights to improve inventory planning and operational efficiency.

Flipkart Sales & Revenue Analytics Dashboard

Tools: SQL, Excel, Power BI

- Developed an end-to-end sales analytics dashboard to monitor revenue, profitability, customer behavior, and regional performance.
- Utilized SQL and Excel to clean, transform, and analyze multi-year e-commerce sales data.
- Created interactive Power BI reports featuring KPI scorecards, customer segmentation, and regional performance tracking.
- Identified high-revenue regions and customer segments through trend and profitability analysis.
- Delivered business insights supporting strategic planning and performance management.

Stock Market Performance & Risk Analysis

Tools: SQL, Excel, Power BI

- Analyzed historical stock market data to evaluate sector performance, market trends, and investment risk.
- Calculated financial metrics including Returns, Beta, Volatility, and Risk-Adjusted Performance indicators.
- Developed Power BI dashboards for sector comparison, trend analysis, and risk visualization.
- Performed correlation and volatility analysis to identify diversification opportunities and market dependencies.
- Delivered insights supporting portfolio evaluation and risk-aware investment decisions.

EDUCATION

B.COM (Computer Applications)

Kakatiya Government College, Kakatiya University | Warangal

Graduated: May 2024

CERTIFICATIONS

Data Analytics Certification – ExcelR, Hyderabad

- Completed hands-on training in SQL, Power BI, Tableau, ETL concepts, data modeling, and dashboard development with real-world analytics projects.

Data Visualisation: Empowering Business with Effective Insights

- Completed a simulation involving creating data visualizations for Tata Consultancy Services
- Prepared questions for a meeting with client senior leadership
- Created visuals for data analysis to help executives with effective decision making

KEY ACHIEVEMENTS & IMPACT

- Maintained data accuracy rate above 98% while processing high-volume operational datasets of 20,000+ records during internship.
- Reduced reporting turnaround time by ~30% through SQL automation and structured data extraction workflows.
- Developed dashboards adopted by operations teams for daily KPI monitoring, replacing manual Excel tracking.
- Identified and resolved 3+ critical reporting discrepancies through root cause analysis, preventing repeated downstream data errors.
